Karachi, Pakistan | +92 335 3948753 | saadali5@gmail.com | linkedin.com/saadali5 | github.com/saadkhi

SUMMARY

AI Engineer with experience in Python, AI/ML, and web app development, including RAG systems, OpenCV, and spiking neural networks. Worked on projects improving automation, data accuracy, and basic user functionality.

EDUCATION

NED University (UIT)

Bachelor of Science in Software Engineering

Graduated: July 2025

CORE SKILLS

- **Programming:** Python, C++
- **AI/ML Frameworks:** TensorFlow, PyTorch, Scikit-learn, Hugging Face, LangChain
- **NLP & LLMs:** Transformers, GPT, Gemini API, OpenAI API
- **MLOps & Deployment:** Docker, Flask/FastAPI, GitHub Actions, AWS/GCP
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Other:** REST APIs, Data Preprocessing, Model Optimization, Django, Streamlit, Power BI, Excel

EXPERIENCE

Avennex – AI Engineer

Sep 2024 – Sep 2025 | Remote (Halifax, Canada)

- Built an AI-powered educational web app with attendance, assignment uploads, and fee tracking.
- Developed an assistant using RAG and OpenAI API to answer textbook-based queries.
- Solved multi-page question recognition using page headers and footers for better AI context handling.

360 Xpert Solutions – AI Engineer Intern

July 2024 – Aug 2024 | Hybrid (Karachi, Pakistan)

- Created a registration platform for a national sports event, automating data entry.
- Built an OpenCV-based verification module to match winners with registration data.
- Added fraud detection logic to backend services to reduce manual checks.

Micro Electronic Research Lab – Research Intern

Sep 2022 – Dec 2023 | Hybrid (Karachi, Pakistan)

- Designed spiking neural network (SNN) models for microprocessors to enable real-time learning.
- Integrated AI algorithms with RISC-V architecture for improved execution speed and energy efficiency.
- Contributed vector masking techniques to the Vaquita open-source RISC-V core for better data handling.

PROJECTS

Resume Rater | Solo Project (Aug 2024) | [Project Link](#)

- Built a web app using TF-IDF and cosine similarity to assess resume-job description alignment.
- Helped 500+ job seekers improve match scores and interview chances.

Emotion Entertainment (EmoEnt) | Solo Project (July 2024) | [Project Link](#)

- Developed a machine learning and image processing tool for song recommendations based on genre/language.
- Achieved 90% emotional alignment accuracy for 1,000+ users.

Hand Gesture-based PowerPoint Control | Final Year Project (2025) | [Project Link](#)

- Designed a system using computer vision and hand tracking to control PowerPoint presentations without physical devices.
- Implemented gesture recognition using Python and OpenCV for seamless slide navigation.
